
Repertoire Search API

Last year, we launched **SoundExchange ISRC Search**, allowing users to find and download International Standard Recording Codes and other identification metadata elements, from our second-to-none repertoire database. A frequent request since that launch was to make an Application Program Interface (API) available. Our API gives developers the ability to incorporate this powerful tool within software and applications already in use by licensees and third-party reporting vendors, allowing "real time" selection of recordings with their ISRCs as needed by DJs and other music programming users.

We are happy to announce that the **SoundExchange Repertoire Search API** is now available, and ready for use.

We also have received requests for a "bulk matching" tool, allowing users to receive ISRCs for large catalog files, so if you have interest in either of these tools, please contact **Licensee Relations**.

SoundExchange Licensee Direct in 2018

We ended our first 2017 quarter with 60% of all monthly royalties to SoundExchange being calculated and certified *online* using **SoundExchange Licensee Direct**. Services are spending less time submitting royalties (with fewer errors) and obtaining ISRCs via augmented Reports of Use (ROUs). As a reminder, **beginning with January 2018 transmissions, all royalties must be calculated and certified online by creating Statements of Account (SOAs) within Licensee Direct**. (We will still accept ROUs delivered via email and sFTP upload, but will no longer offer an Excel version of the SOA form.) So, if you aren't using it already, please visit **SoundExchange Licensee Direct** today, and our **Licensee Relations** team will be happy to get you all squared away.

Check us out on the road!

Florida Association of Broadcasters - 2017 Annual Convention

June 21-22, 2017
Ft. Lauderdale, FL
